

Get accurate shipping rate quotes with the most intelligent, integrated shipping solution for Microsoft Dynamics NAV.

ChargeLogic Shipping incorporates all the key functionality needed for packing and shipping while providing accurate rate quotes, potentially saving you thousands of dollars in credit card processing fees.

ChargeLogic Shipping: The Easy Choice.

ChargeLogic Shipping gives you the key functionality that you need to make shipping and packing a profitable piece of your business. ChargeLogic Shipping is packed with features that make everything easier from identifying what items are in which packages for real-time tracking to making returns a snap for customers. It's easy to implement and easy to manage.

ChargeLogic Shipping: The Smart Choice.

ChargeLogic Shipping's Smart Pack Technology virtually packs each item and takes the guesswork out of rate quoting. By virtually packing shipments, ChargeLogic Shipping determines the number of packages needed and which packing materials are necessary for each order.

ChargeLogic Shipping allows you to charge shipping rates based on the weight and size of packages or you can set pricing by category. If you chose weight-based pricing, ChargeLogic Shipping integrates with the carrier and provides accurate weight and dimensional information for correct weight quoting.

ChargeLogic Shipping's Smart Weight Technology learns more about each item every time it is shipped for greater weight accuracy. The category pricing option offers a simple way to set standard delivery and processing charges by any category that you set, such as order total, product type, weight total, and flat rate shipping.

Regardless of which pricing option you choose, ChargeLogic Shipping enables you to accurately collect shipping fees at the time of order.

ChargeLogic Shipping: The Right Choice.

ChargeLogic Shipping incorporates all the right functionality for a simplified implementation. With features like direct carrier connections, you don't have to worry about updating carrier rates or labels. And ChargeLogic Shipping provides online address validation to reduce costs associated with returned shipments.

KEY FEATURES

- Smart Pack Technology
- Smart Weight Technology
- Direct Carrier Connections
- E-mail Return Labels
- International Shipping
- Scales Interface
- Rate Estimates
- Export Documentation
- Carrier Labels

KEY BENEFITS

- Accurate rate quotes
- Reduced costs
- Time savings
- Easy to use

Take the Guesswork Out of Shipping

Smart Pack Technology

Smart Pack Technology virtually packs each item to provide businesses with another layer of intelligence for increased rate quoting accuracy and package management.

- **Smart Pack Technology** virtually packs each item, based on the packaging supplies in a company's inventory
- Removes the guesswork out of rate quoting by virtually packing shipments to determine the number and sizes of packages needed to ship the order
- Package Management
 - Reports what items are in each box so you can inform customers what is in each package and where a package is throughout the transit process
 - Provides the ability to accurately value each package in a shipment
- Enter both weight and dimension at either Product Group, Item Category, or Item level in NAV
- Automatically updates each item's master file as product dimensions are learned
- Uses shipment history to learn and refine each item's exact size

Smart Weight Technology

Smart Weight Technology learns more about the weights of your products each time you ship them.

- Smart weight technology uses shipment history to learn and define each item's exact weight
- Choose a shipment pricing structure: individual shipment weight or category pricing
 - ChargeLogic Shipping gives businesses the ability to provide exact shipping fees by item weight and bill for shipping when the order is placed
 - Businesses can also choose from flat rate, category based pricing that is set by any category you choose such as price range, weight range, region, product type, and more
- Supports free shipping based on preset criteria
- Automatically updates each item's master file as product weights are learned
- Uses shipment history to learn and refine each item's exact weight
- Provide accurate weight estimates
- Enables businesses to correctly mark-up carrier fees to account for packaging and labor costs

Direct Carrier Connections

ChargeLogic Shipping connects directly to shipping carriers to provide improved customer service, increased NAV functionality, streamlined processes, and lower cost of ownership.

- Available carrier connections: UPS, USPS, and TNT
- Provides carrier service information and rates for each service level based on package weight, dimensions, and destination
- Provides transit times for each service level
- Connects directly to the carrier via the Internet, ensuring that rates are always current
- Eliminates manual load of carrier rate tables
- Address validation
 - Validates addresses before label generation
 - Provides the option to choose from corrected address candidates or to keep the original
 - Safeguards against incorrectly keyed information, saving costs from returned shipments and associated return processing charges from carriers
- Provides label directly from carrier so you know your shipments will always be delivered
- Integrates with NAV Shipping Agent

Return Shipments

ChargeLogic Shipping makes it easy to give your customers a positive order and returns process.

- Emails a prepaid return shipping label directly to customers for easy returns
- Option to include an automatic prepaid return label in each package (carriers may charge a fee)
- Return labels are printed with NAV Return Order number for more efficient warehouse receiving
